Objective

   I am seeking a position in which I can build and further my skills and experience as a developer in this industry. I would like to find a place of employment where I can remain focused on moving forward and improving not only myself but the technologies I work on.

Skills

- Java, Android, Github, HTML.
- Back-end development with Spring, Salesforce and Room.
- Attentive to detail, self-motivated, and energetic.
- Proven ability to work cooperatively and effectively with diverse team members.
- Ability and willingness to adapt and learn new technologies.

Automotive

- ASE Certifications A4, A5 and A6. A8 soon to come
- Valid New Mexico Driver's License.
- Ability to use proper tools and diagnostic equipment to repair, replace and test parts.
- Experienced with hand tools and pneumatic equipment.
- Good understanding of routine technical documents, such as safety rules, and MSDS sheets.
- Safety oriented; knowledgeable of OSHA regulations pertaining to shop environments.

Experience

Technology

Moose Cash Register(Various times throughout the years)
-Programming, installing, maintaining and training on different platforms and systems.

Automotive

For the past 5 years I have worked at various independent, franchise and dealership shops. I have experience in multiple areas of the vehicle but have been more of an under car and 12 volt specialist. I carried out duties such as tracking/maintaining inventory, communicating with customers, diagnostics, and have of course performed various repairs throughout all aspects of the vehicle. I enjoy working with my hands however seeing the tech change in vehicles has made me want to pursue something I've always had a passion for, _**coding**_.

Cook

Trombino's Bistro *(2008-2013)*
-Worked various positions throughout the kitchen

Education

I have completed the Automotive Technology program at CNM and have received my associates degree in the field along with certifications. I am currently in a Deep Dive Coding Bootcamp seeking new knowledge to pursue a career as a developer. After the bootcamp I intend on continuing my career development and learning in the Computer Science field.

Computer Science
Java-Andoid-Salesforce bootcamp(08/18)

Automotive Technology
Automotive Service Fundamentals (08/13)
Automotive Technology (05/14)

Welding
Welding Fundamentals (12/13)
